

Sriram Selvaraj

Senior Software Engineer — React • React Native • TypeScript • JavaScript

+91 9080880431 — [✉ sriramsearch44@gmail.com](mailto:sriramsearch44@gmail.com) — [🌐 LinkedIn](#) — [🐙 GitHub](#) — [📁 Portfolio](#)

Summary

Senior Frontend Engineer with 5+ years of experience building scalable web and mobile applications using React, React Native, and TypeScript. Experienced in designing modular frontend architectures, optimizing application performance, and integrating REST APIs in production environments. Proven ability to deliver high-quality applications in agile teams while improving development efficiency through reusable component systems and modern engineering practices.

Skills

Languages JavaScript (ES6+), TypeScript

Frontend React.js, React Native, Next.js, Redux

Styling HTML5, CSS3, TailwindCSS, Material UI

Backend Node.js, Express.js, REST APIs

Databases MongoDB, MySQL

DevOps AWS, Docker, CI/CD

Testing Jest, Unit Testing

Tools Git, GitHub, VS Code, Cursor AI, Postman, JIRA, Chrome DevTools, Figma

Experience

Senior Software Engineer

Jul 2025 – Present

Mphasis

Tech: React Native, TypeScript, Firebase Auth, Cloud Functions, SonarQube

- Led development of scalable React Native features for the DELV digital platform, improving application maintainability and accelerating mobile feature delivery.
- Implemented secure authentication using Firebase Auth with Cloud Functions, building a bridge layer between the React Native application and backend services.
- Integrated SonarQube into CI pipeline to monitor code quality and maintainability.
- Managed Android app bundling and release process via Google Play Store, successfully deploying builds for internal and closed testing tracks to enable efficient QA validation cycles.
- Improved development productivity by introducing AI-assisted coding workflows using Cursor AI, reducing feature development time by 50%.
- Designed modular component architecture enabling reusable UI patterns across mobile modules.

Software Engineer

Feb 2023 – Jul 2025

HST Global

Tech: React, React Native, TypeScript, REST APIs

RedBox Rx — Telemedicine Platform

- Architected scalable React Native project structure improving code maintainability and developer onboarding.
- Developed mobile application features integrating secure authentication, REST APIs, and payment gateway services.
- Optimized component rendering and API integration workflows improving application performance.

Software Engineer

Jun 2021 – Feb 2023

Emproto Technologies

Tech: React, TypeScript, GraphQL, Redux, Chart.js, Material UI

Prosprr — Financial Analytics Platform

- Built responsive financial dashboards using React and Chart.js for real-time financial insights.
- Implemented GraphQL integrations and Redux state management improving data consistency across modules.
- Collaborated with product teams to translate business requirements into scalable frontend architecture.

Black Tulip — E-commerce Platform

- Developed reusable UI components using React and Material UI improving UI consistency.
- Integrated REST APIs for product catalog, cart management, and order processing.
- Implemented secure checkout workflows improving transaction reliability.

Customer Relations Officer

Jan 2019 – Dec 2020

Altruist Technologies

- Managed customer communication and resolved service issues maintaining high satisfaction.
- Collaborated with internal teams to analyze recurring issues and improve processes.

Education

B.Sc Computer Science

2015 – 2018

Sri Krishna Arts and Science College

Personal Projects

Form Handling Application

2021

Stack: React, Node.js, Express, TypeScript, MongoDB

- Built a full-stack form management system allowing users to submit and store form data via REST APIs.
- Developed backend APIs using Node.js and Express with MongoDB.
- Designed responsive frontend UI using React.

Certifications

- Full Stack Development Certification — HTML, CSS, MERN Stack, Board Infinity Institute
